

**DYO BOYA FABRİKALARI A.Ş.**, which carries out production and sales activities in Industry, Automotive, Furniture, Marine, Construction Paints, Powder Coating and Insulation sectors is a Yaşar Holding company. Yaşar Holding signed on 12 November 2007 the UN Global Compact of which the ENVIRONMENT is one of the four main headings.

In order to create a more livable environment for its employees, customers, suppliers and the society in which it is located, as DYO BOYA FABRİKALARI A.Ş, in addition to customer satisfaction on which it is based with this sense of responsibility, by acting in accordance with the legal regulations and establishment conditions, with the awareness that our environment is borrowed from future generations, it undertakes the following;

- Efficient use of energy and natural resources as a result of acting with basic environmental management principles such as reducing at source, reuse, recycling and disposal until the end user,
- To maintain a balance between socio-economic needs, prevention of pollution and protection of the environment,
  - To leave a livable environment to future generations for sustainable development by using environmentally friendly inputs in the design of its products,
  - Implementing policies that include the assessment of environmental impacts in new investments,
- Establishing the structure that will provide the training, planning and activities necessary for the continuity and improvement of all these activities,
- Announcing and keeping our policy open to meet the expectations of our customers, employees and the society affected by our activities,
  - Reviewing the objectives and targets of the Environmental Management System in regular and changing conditions, and trying to continuously increase the environmental performance,
  - Preparing an internal emergency plan to reduce the effects of major accidents and ensuring that this plan is implemented in the organization,
- Ensuring that the persons in the organization, competent authorities and neighboring organizations are informed about major industrial accidents related to the environment and, making arrangements to alert the public,
- Monitoring and reporting major accidents or near miss situations and determining the necessary corrective actions related to them,
- To provide and evaluate information about major accidents and near miss cases occurring within the organization and other organizations,
- To ensure that legal regulations, internationally accepted scientific methods or standards and technological developments are followed up.
