

## OUR CIRCULAR ECONOMY AND WASTE POLICY

We commit such as;

- Will prioritize designing products with an environmental and circular economy approach in the product-life cycle,
- Will manage wastes by separating them according to their types at the source, and we will take all necessary measures to reduce emissions in our waste processes,
  - Will use methods that will not harm the environment and human health,
- Will support measures to increase the contribution value and healthy disposal of waste and take part in related projects,
  - Will take part in the necessary work to improve waste management in line with the environmental standards we are subject to,
- Will contribute to the circular economy by preferring packaging that can be recycled while delivering our products to customers,

as a DYO BOYA FABRİKALARI A.Ş. carries out production and sales activities
