

## OUR ENVIRONMENT POLICY

We commit

with the awareness that it was received to consider that Yaşar Holding is a party to the UN Global Compact, in addition to customer satisfaction based on a sense of responsibility, it also acts in accordance with legal legislation and establishment conditions in order to create a more livable environment for its employees, customers, suppliers and society, and ensures that our environment is protected from future generations;

-Efficient use of energy and natural resources as a result of acting with basic environmental management principles such as reducing at source, reuse, recovery and disposal until the final consumer,

-Maintain a balance between socio-economic needs, pollution prevention and environmental protection,

-To leave a livable environment for future generations for sustainable development by using environmentally friendly inputs in the design of its products,

-Implement policies that include the assessment of environmental impacts in new investments,

-Establishing the structure that will provide the necessary training, planning and activities for the continuity and improvement of all these activities,

-Communicate and keep our policy clear to fulfill the expectations of our customers, employees and the community affected by our activities,

-To review the goals and objectives of the Environmental Management System regularly and in view of changing conditions and to continuously strive to improve environmental performance,

-To ensure that the internal emergency plan to reduce the effects of major accidents is prepared and the plan is implemented in the organization,

-To ensure that persons in the organization, competent authorities, neighboring organizations are informed about major industrial accidents related to the environment and to make arrangements for public alerting,

-Monitoring and reporting of major accidents or near misses and ensuring that necessary corrective actions are identified,

-To ensure the provision and evaluation of information on major accidents and near misses occurring within the organization and in other organizations,

-Ensure that legal regulations, internationally recognized scientific methods or standards and technological developments are followed,
